

ScholarBird User Guide

Official User Manual — Version 1.0

ScholarBird — Fly Towards Your Future. A modern, AI-powered scholarship discovery platform built with Flutter and Firebase. This manual guides students and evaluators through account setup, profile completion, scholarship discovery, application workflows, AI recommendations, and premium features. Designed for clarity and print-quality on A4 portrait pages.

Table of Contents

1. Introduction

What ScholarBird is and key benefits.

2. Key Features

Overview of major platform capabilities.

3. User Registration

Sign up, login, password recovery, Firebase auth.

4. Completing Academic Profile

Fields required and why they matter for AI.

5. Home Screen

Dashboard, search, filters, bookmarks.

6. Scholarship Details

All scholarship metadata and actions.

7. Saving Scholarships

Bookmark behavior and Firestore sync.

8. Applying for Scholarships

Step-by-step apply flow and storage.

9. My Applications

Track statuses, view history, timelines.

10. AI Scholarship Advisor

How recommendations are generated (Gemini integration).

Additional chapters: Premium Membership, FAQ, Contact, and final illustrations are included later in this guide.

Key Features

Secure Login

Firebase Authentication with email verification and secure session handling.

Scholarship Discovery

Advanced search, keyword relevance, and filter by country, degree, and deadline.

Scholarship Details

Comprehensive metadata: eligibility, funding, documents, deadlines, and links.

Bookmark Scholarships

Save opportunities to your account and access them across devices with Firestore sync.

Apply System

In-app application submission with attachments and auto-storage in Applications collection.

Application Tracking

Real-time status updates: Pending, Approved, Rejected. Timeline and history views.

AI Scholarship Advisor

Gemini-powered recommendations tailored to your profile and past behavior.

Premium Membership

ScholarBird Pro unlocks unlimited applications, resume and SOP assistance, and priority insights.

Profile Management

Complete academic profile fields to improve AI accuracy and application readiness.

Firebase Cloud Database

Firestore-backed data model for scholarships, bookmarks, and applications with security rules.

Real-time Synchronization

Instant updates across devices so your saved scholarships and application statuses stay current.

User Registration

ScholarBird uses Firebase Authentication to manage user accounts securely. New users can Sign Up with email and password, then verify their email. Returning users use Login. A Forgot Password flow enables users to request a password reset link via email.

1. Sign Up: Enter name, email, password → verify email link.
2. Login: Email + password → optional persistent session.
3. Forgot Password: Request reset → follow emailed link.

- ❑ Use email verification to protect account integrity and improve recommendation trust.

The login screen features the ScholarBird logo at the top, followed by the tagline 'Discover Your Path to Success'. Below this is a 'Welcome Back' section with the prompt 'Sign in to continue exploring scholarships'. The login form includes fields for 'Email Address' and 'Password', with a 'Forgot Password?' link next to the password field. A blue 'Login' button is positioned below the fields. An 'OR' separator is followed by a 'Continue with Google' button. At the bottom, a link says 'Don't have an account? Sign Up'.

Firebase security rules enforce authenticated reads/writes and ensure each user's bookmarks and applications are isolated in Firestore under their UID.

Completing Academic Profile

A complete profile powers ScholarBird's AI advisor. Populate each field accurately to improve match quality. Fields include:

- Name
- Email
- Country
- Degree
- Field of Study
- CGPA
- CGPA Scale
- Skills
- Preferred Study Country

Completed profiles enable better filtering (e.g., minimum CGPA) and stronger AI recommendations because the advisor uses numeric and categorical signals to score eligibility.

The profile screen shows a user named 'Nirob' with email 'nirob@gmail.com'. It includes buttons for 'BBA' and 'Postgraduate' degrees. A 'Profile completion' progress bar is at 43%. Below this is a 'ScholarBird Free' status box with an 'Upgrade Now' button. The 'GENERAL SETTINGS' section contains links for 'Edit Profile', 'Academic Profile', 'Scholarship Preferences', and 'Saved Scholarships'. A bottom navigation bar includes icons for Home, Explore, AI Advisor, Applications, and Profile.

Home Screen

The Home screen is the primary dashboard. It surfaces matched scholarships, search, quick filters, and bookmarked items. Key UI elements:

- Scholarship cards — quick metadata and actions
- Search bar — instant keyword matching
- Filter chips — degree, country, funding type, deadline
- Newest scholarships — chronological feed
- Bookmarks quick access — saved items
- Bottom navigation — Home, Search, Applications, Profile

Tip: Use filters to narrow results and save commonly used filter presets for faster discovery.

Scholarship Details

Each scholarship detail page consolidates all eligibility and administrative information. Clear CTAs allow bookmarking or applying directly from the page.

- Scholarship Title
- Country
- Degree
- Field
- Deadline
- Funding Type
- Minimum CGPA
- IELTS Requirement
- Research Requirement
- Description
- Official Website (external link)
- Bookmark Button
- Apply Button

The Apply button opens a guided submission form. For externally hosted applications, the Official Website link opens the provider page.

Saving Scholarships

Saving a scholarship creates a Bookmark document under the authenticated user's Firestore collection. Bookmarks sync in real time across devices and are accessible from the Bookmarks area in the Home navigation.

Bookmarked items persist in Firestore and include a timestamp, scholarship ID, and snapshot of essential metadata to ensure offline availability.

Applying & My Applications

Applying for Scholarships

The application flow captures user submissions and stores them in the Firestore Applications collection. Typical steps:

1. Open Scholarship Details → Tap Apply Now
2. Complete application form (attach CV, transcripts, SOP)
3. Submit — write stored to /applications with user UID and scholarship ID
4. View status in My Applications

📄 Application statuses: Pending, Approved, Rejected. Status updates are pushed in real time.

My Applications

The My Applications screen lists each submission with status, date, and quick actions to view details or withdraw an application. A timeline visualization shows status changes and reviewer notes.

App Overview

ScholarBird is an AI-powered scholarship discovery platform built with **Flutter** and **Firebase**. It helps students discover, save, and apply for scholarships while offering personalized recommendations and application assistance. The product combines intuitive UX, secure cloud sync, and intelligent matching to streamline scholarship search and application management.

Discover
Find scholarships filtered by degree, country, and eligibility.

Save
Bookmark opportunities to curate your shortlist and track deadlines.

Apply
Apply directly or export completed application packets with guidance.

AI Scholarship Advisor — How It Works

ScholarBird uses Gemini-class AI models to analyze user profiles and scholarship requirements. The system generates tailored recommendations and explains match reasons so students understand why each opportunity fits. Recommendations combine deterministic eligibility checks with probabilistic ranking from the AI model.

The AI considers the following profile signals:

- Academic Background — major, coursework highlights, awards
- CGPA — normalized to institution scale for fair comparison
- Degree — bachelor, master, PhD and field-specific requirements
- Skills — programming, research, languages, certifications
- Country — citizenship/residency constraints
- Preferred Study Country — target destinations and visa considerations

Recommendation System & Examples

The recommendation engine ranks scholarships by compatibility score and provides human-readable reasons. Scores combine eligibility checks, historical acceptance signals, and AI-inferred fit. Users can filter by deadline, match score, and award size.

DAAD Scholarship

95% Match

Reason: Your CGPA and Computer Science background satisfy eligibility. Strong research skills and preferred study country alignment.

Fulbright Program

88% Match

Reason: Strong leadership experience and statement of purpose; minor visa restrictions apply.

University Merit Award

82% Match

Reason: High CGPA and local residency; recommendation suggests adding research publications to increase competitiveness.

ScholarBird Pro — Premium Membership

ScholarBird Pro unlocks advanced features for applicants who want priority support and higher success odds. Membership adds private AI advising, dedicated review tools, and priority access to new scholarships.

Unlimited Applications

Submit and track an unlimited number of scholarship applications without limits.

AI Scholarship Advisor

Priority AI recommendations with tailored action items and match explanations.

Resume Guidance

AI-driven resume optimization and formatting templates for scholarships.

SOP Assistance

Statement of Purpose drafts, feedback loops, and example libraries.

Priority Features

Early access to curated scholarships and faster AI processing.

Subscription Dashboard: Manage billing, view membership expiry, and toggle premium badge visibility. Premium accounts display a gold badge on user profiles to signal priority status.

FAQs

How do I apply?

Open a scholarship card, review requirements, and tap "Apply". Follow the guided checklist to upload documents and submit. You can track application status in the Applications tab.

How do I save scholarships?

Tap the bookmark icon on any scholarship card. Saved items appear in your "Saved" list with deadline reminders and notes.

How does AI work?

Gemini-class AI encodes your profile signals and scores scholarships by eligibility and inferred fit. Explanations accompany recommendations so you can act on specific improvements.

Can I edit my profile?

Yes — go to Settings → Profile to update academic details, skills, and preferred countries. Updates refresh recommendation results in real time.

Is Premium required?

No — core discovery and saving features are free. ScholarBird Pro is optional for unlimited applications, priority AI advising, and enhanced guidance.
